

**100% Pure
GAMBIAN**

HONEY AND WAX

What we bring to you...

100% pure natural Gambian honey or wax cream.

Who We are...

The National Beekeepers' Association of The Gambia is a not for profit organisation committed to sustainable development in The Gambia

What that means...

NBAG works to create wealth in rural communities. We do this by training small farmers who are NBAG members in beekeeping and we provide ongoing practical advice and support.

Traditionally, honey is taken in a process that destroys the hive and may cause bush fires. We train farmers to be *beekeepers* so they can produce higher quality honey without destroying the habitat. In fact, beekeeping requires healthy woodlands so making honey protects environments that might otherwise be destroyed.

We provide a ready market for the honey and wax our members produce and our purchasing prices are well within international fair trade price guidelines. We bring to the market a better product at a better price for rural people.

The end result is truly local Health and Wealth!

For more information about NBAG contact MondoChallenge in the UK (+44 1635 391 43/ info@mondochallenge.org) or visit us at our Bee Centre on the Brikama Highway between Brikama and Farato.
